

Capability Statement

Aerospace Precision Machine Shop

Aerobotech RTD Corporation: Proudly established in 1984, we are a Woman-Owned Small Business headquartered in Jackson, Michigan, which specializes in subtractive and additive manufacturing, reverse engineering, and assembly of precision parts for the Aerospace and Defense Industries. We deliver AS9100D compliant components with unmatched quality, tight tolerances, and on-time delivery, as evidenced by top-tier scorecards from our defense and space industry clients.

CAGE Code

14YW0

UEI

JB3MGFD68CZ3

5-Axis Mills

Core Competencies

Advanced CNC Machining
3-, 4-, and 5- Axis Milling
Dual Spindle, Dual Turret,
Live-Tooling Lathes
Prototyping to Production
Fracture-Critical
Components AI-Driven
Manufacturing Aerospace
Metals Expertise Automated

Compliance & Quality

AS9100D Certified - 2025-26
ITAR and DFAR Compliant - Q1 26
Women-Owned Small Business - Q4 25
CMMC Level 2 - Q2 26
Lean Six Sigma | 5S Methodologies
Continuous Employee Training in
Advanced and AI-Driven Technologies

Differentiators

100% Delivery and Quality
Versatility in Scale State-of-
the-Art Technology Robotics
and Automation Artificial
Intelligence
Embracing Complexity:
Tackling designs others decline
Continuous Innovation
Challenging Projects
Trained and Skilled Team
Customer-Centric Approach

AEROBOTTECH

Capability Statement

Virgin Galactic Landing Gear

- 247 Individual Parts per Spacecraft
- Over 3,000 parts per year
- Six Spacecraft per year for the next five years
- Hard Metal and Specialty Materials
- Tolerances up to ± 0.0001 "

Spacecraft Landing Gear

Aileron Flap Tracks

Boeing 737 MAX Aileron Flap Tracks

- Parts/Aircraft | 464/Month | 4.5 hour Run Times 465
- Stainless Steel (54 HRC)
- Fracture Critical Machining Certified
- End-to-End Blue Streak Production Management
- Manufactured Boeing Parts Since the 747

NASA/ULA Delta Heavy Rocket

- Booster Stability Criticality
- 100% Delivery and Quality
- Hundreds of Parts for Atlas and Delta Rockets
- Maintained ± 0.0001 " Post-Plating
- Worked for NASA/ULA throughout Atlas and Delta
